

SOLARTEC

INNOVATIVE TECHNOLOGIES

Engineering without borders

ABOUT COMPANY

SOLARTEC engineering and technical company was established in 2000 in Astana - the youngest capital city in the world with which we were rapidly growing and developing together! Since then we have gained huge experience in the spheres of design, installation and service maintenance of MEP systems.

We provided professional equipment of hundreds of facilities. Our clients include eminent domestic and foreign companies, major government customers and high-profile public organizations.

Our aim is to work so that our clients could come back to us in future, to develop and try to achieve leading positions on the MEP systems market.
